

PROCEEDINGS OF THE 15th ANNUAL CONFERENCE ON  
COMPUTERS AND INDUSTRIAL ENGINEERING

**OPTIMIZATION**

- |   |    |  |
|---|----|--|
| <b>Yozo Nakahara and Mitsuo Gen</b>   | 1  | A method for solving linear programming problems with triangular fuzzy coefficients using new ranking index    |
| <b>Dong Shang Chang and Raykin R. Tan</b>   | 5  | Confidence bounds of the Weibull failure rate  |
| <b>Masato Sasaki and Mitsuo Gen</b>   | 9  | An extension of interactive method for solving multiple objective linear programming with fuzzy parameters     |
| <b>Steven H.-Y. Lai</b>   | 13 | Fuzzy logic controller design for spacecraft proximity operations  |
| <b>Hyunchul Kim, Kenichi Ida and Mitsuo Gen</b>   | 17 | A <i>de novo</i> approach for bicriteria 0-1 linear programming with interval coefficients under GUB structure |
| <b>Laurence J. Moore, Jack C. Davis, Aubrey E. Harvey, John J. Imholz, Robert J. McIlwain and Bernard W. Taylor III</b> | 21 | Multicriteria models for analysis of the environmental restoration and waste management program                |
| <b>Swaminathan Murugabaskar and Wilfred V. Huang</b>  | 25 | Simulation analysis with group screening   |
| <b>Rasaratnam Logendran and Parthasarathi Ramakrishna</b>   | 29 | Effect of machining time in the duplication process of machine cells formation                                 |
| <b>Fernando Mata</b>  | 33 | Common random numbers and multinomial selection  |

**TQM**

- |  |    |   |
|--|----|---|
| <b>Sitki Gozlu</b>                       | 37 | Quality circle activities in the Turkish establishments                                     |
| <b>Mohammed Nadeem and Tomas Velasco</b> | 41 | Knowledge-based approach to quality control assurance using bar code identification systems |

**TRAINING AND EDUCATION**

- |  |    |   |
|--|----|---|
| <b>Jocelyn Drolet and Ram Lakshmanan</b> | 45 | Computers and industrial engineering courses: a winning combination |
|--|----|---|

## Contents

- |  |    |  |
|--|----|--|
| Chuen-lung Chen and Stanley F. Bullington                  | 49 | Development of a strategic research plan for an academic department through the use of quality function deployment |
| Azim Houshyar and Victor Nuila                             | 53 | Required steps for successful design and implementation of simulation  |
| C. Ray Asfahl, Sandy Swayze, Joanne Lee and Robert Safford | 57 | An interactive computer training program for industry  |
| Bala Ram, Eui Park and Silvanus Udoka                      | 61 | An interdisciplinary laboratory for manufacturing education  |

### ***PRODUCTION OPERATIONS MANAGEMENT***

- |  |    |  |
|--|----|--|
| Taqi N. Al-Faraj, Abdulaziz S. Alidi and Jamal A. Al-Zayer | 65 | Vendors selection via a spreadsheet analytical hierarchy process   |
| Yasser Hosni and Labiche Ferreira                          | 69 | Justification of new technologies through the use of "cause and effect" analysis: case of tile replacement at Kennedy Space Center |
| Chao-Yen Wu and Tongqian Jin                               | 73 | Forecasting methods for industry and business  |
| Farhad Tadayon and Ming C. Liu                             | 77 | Principal component analysis: a tool for assembly management   |
| Phuong Loan Nguyen and Lionel Dupont                       | 81 | Production management of a steel manufacturing system: a hierarchical planning model   |
| Chao-Yen Wu  | 85 | Reliability analysis for a single-area generation system   |
| Surendra M. Gupta and Louis Brennan                        | 89 | The performance of materials management in multi-level product structures with demand uncertainty and back-ordering                |

### ***EXPERT SYSTEMS, ARTIFICIAL INTELLIGENCE***

- |   |     |   |
|---|-----|---|
| Kent E. Williams and Timothy G. Kotnour             | 93  | An electronic performance support system for organizational learning                    |
| Mahendra Kadidal and Bopaya Bidanda                 | 99  | A castability expert system   |
| Kevin J. Leonard                                    | 103 | Detecting Credit Card Fraud Using Expert Systems  |
| Lee C. Daugherty, Hamid R. Parsaei and Sai S. Kolli | 107 | Strategic justification of advanced automated technology systems using an expert system |

## Contents

<b>Y. Y. Su, K. Srihari and Jim Adriance</b>	<b>111</b>	A knowledge update mechanism for an adhesive advisor
<b>Pamela McCauley Bell and Adedeji B. Badiru</b>	<b>115</b>	Concept mapping as a knowledge acquisition tool in the development of a fuzzy rule-based expert system
<b>Steven Hill Rogers and Adedeji B. Badiru</b>	<b>119</b>	A fuzzy set theoretic framework for knowledge-based simulation
<b>Y. Y. Su and K. Srihari</b>	<b>123</b>	A knowledge based aircraft-gate assignment advisor
<b>Eyler Coates and T. Warren Liao</b>	<b>127</b>	Automatic reintegration of previously machined materials
<b>David A. Ress and Kenneth R. Currie</b>	<b>131</b>	Development of an expert system for scheduling work content in a job shop environment
<b>Steven H.-Y. Lai</b>	<b>135</b>	Engine system diagnosis using vibration data

## **NETWORKING COMMUNICATION**

<b>Silvanus J. Udoka</b>	<b>139</b>	Electronic data interchange (EDI) electronic graphics interchange (EGI) and bar codes: fundamental components of your world-class manufacturing enterprise
<b>Jung Bok Jo, Yasuhiro Tsujimura, Mitsuo Gen and Genji Yamazaki</b>	<b>143</b>	A delay model of queueing network system based on fuzzy sets theory
<b>Shinkoh Okada and Mitsuo Gen</b>	<b>147</b>	Order relation between intervals and its application to shortest path problem
<b>Sam Hsu and Mohammad Ilyas</b>	<b>151</b>	A simulation study of bursty data traffic with hybrid source smoothing in an ATM node
<b>Kurapati Venkatesh and Mohammad Ilyas</b>	<b>155</b>	Modeling, controlling, and simulation of local area networks for flexible manufacturing systems using Petri nets
<b>Godfrey I. Archibong and Mohammad Ilyas</b>	<b>159</b>	An efficient technique for integrating voice and data in wireless communication with a cellular structured environment

## **SIMULATION**

<b>Kenneth R. Morrison, David W. Poock and Charles W. White</b>	<b>163</b>	Forecasting the consumption of gasoline in the U.S.
<b>Susan M. West, William W. Swart and Muzaffar A. Shaikh</b>	<b>167</b>	A proposed testbed for evaluating adaptive routing algorithms
<b>Celestine A. Ntuen</b>	<b>171</b>	A new approach to modeling human response errors in synthetic flight simulation domain

<b>Samir M. Benmakhlouf and Suresh K. Khator</b>	175	Smart lifts: control design and performance evaluation
<b>Aubrey E. Harvey and Michael C. Kleder</b>	179	A metric for consensus—design and calibration
<b>Amy Henninger</b>	183	Reducing weapons systems' life cycle costs with simulation modeling
<b>Thomas M. West, Angela N. Amundson and Sabah U. Randhawa</b>	187	Evaluation of alternative materials handling systems
<b>Emine Persentili and Sema Alptekin</b>	191	Integration of simulation modeling and computer aided production management in computer integrated enterprise
<b>Tarun Gupta and Somchin Leelaket</b>	195	A simulation study comparing GT vs. job shop manufacturing systems

### **COMPUTER AID PROCESS PLANNING**

<b>Hoo-Gon Choi and Chang Hyo Moon</b>	199	Performance comparison of two-dimensional clustering algorithms in group technology
<b>T. W. Liao, E. R. Coates, F. Aghazadeh, L. Mann and N. Guha</b>	203	Modification of CAPP systems for CAPP/scheduling integration
<b>Sunil Dhage and John M. Usher</b>	207	Computer-aided tool selection for turning and boring
<b>Robert L. Williams and Yen-Gi Lee</b>	211	Determination of minimum three-dimensional cutting-tool paths in the presence of barriers

### **SCHEDULING AND SEQUENCING**

<b>Richard A. Thelen and Kenneth R. Morrison</b>	215	Customized job shop scheduling application development
<b>Venkateswara S. Vempati, Chuen-Lung Chen and Stanley F. Bullington</b>	219	An effective heuristic for flow shop problems with total flow time as criterion
<b>Wade C. Driscoll</b>	223	A microcomputer-based scheduling assist system
<b>Young-Hoon Lee and Sooyoung Kim</b>	227	Neural network applications for scheduling jobs on parallel machines
<b>Stephane Dauzere-Peres and Jean-Bernard Lasserre</b>	231	An iterative procedure for lot streaming in job-shop scheduling
<b>Stephane Dauzere-Peres</b>	235	The one-machine sequencing problem with dependent jobs

## Contents

<b>Yasuhiro Tsujimura, Seung Hun Park, In Seong Chang and Mitsuo Gen</b>	<b>239</b>	<b>An effective method for solving flow shop scheduling problems with fuzzy processing times</b>
<b>Gürsel A. Süer, Eduardo Báez and Zbigniew Czajkiewicz</b>	<b>243</b>	<b>Minimizing the number of tardy jobs in identical machine scheduling</b>
<b>Gürsel A. Süer and Miguel Saiz</b>	<b>247</b>	<b>Cell loading in cellular manufacturing systems</b>
<b>Gürsel A. Süer and Rafael A. Lizardi</b>	<b>251</b>	<b>Scheduling in an MRP environment</b>
<b>Narasimha R. Mannur and Jyothi Babu Addagatla</b>	<b>255</b>	<b>Heuristic algorithms for solving earliness-tardiness scheduling problem with machine vacations</b>
<b>Ming Liang</b>	<b>259</b>	<b>Part selection, machine loading, and machining speed selection in flexible manufacturing systems</b>
<b>Juichin Jiang and Ming-ying Chen</b>	<b>263</b>	<b>The influence of alternate process planning in job shop scheduling</b>
<b>Cihan Dagli and Sinchai Sittisathanchai</b>	<b>267</b>	<b>Genetic neuro-scheduler for job shop scheduling</b>

## ***WORLD OF I.E.***

<b>Mordecai Avriel and Michal Penn</b>	<b>271</b>	<b>Exact and approximate solutions of the container ship stowage problem</b>
<b>John H. Manley</b>	<b>275</b>	<b>Information process flow analysis (IPFA) for re-engineering manufacturing systems</b>
<b>Tanvir Arfi and Hamid M. Lankarani</b>	<b>279</b>	<b>Development of logical deductive fault diagnostic technique for real time application</b>
<b>Chandra Kompalli and Hamid M. Lankarani</b>	<b>283</b>	<b>Automated path planning for face milling of N-sided convex polygonal surfaces using staircasing strategy</b>
<b>Marco Gagliardi and Cosima Spera</b>	<b>287</b>	<b>A model to manage a large number of transactions: a case study</b>
<b>Ahmed A. Moreb and Abdullah Omer Bafail</b>	<b>291</b>	<b>Dynamic data systems models for predicting the load demand</b>
<b>Abdullah Omer Bafail and Ahmed A. Moreb</b>	<b>295</b>	<b>Optimal allocation of students to different departments in an engineering college</b>
<b>Nael A. Aly and Rhonda Mack</b>	<b>299</b>	<b>TQM implementation in hospitals</b>
<b>Andrew E. Jackson, Robert R. Safford and William W. Swart</b>	<b>303</b>	<b>Critically indexing for job/task improvement at the Kennedy Space Center</b>

### ***DATABASE DEVELOPMENT***

- |  |            |  |
|--|------------|--|
| <b>Cynthia M. Walton</b>   | <b>307</b> | Time standard and reject data collection system  |
| <b>Farah D. Shooshtarian,<br/>Dar-Jen Chang,<br/>Jian (John) Dong and<br/>Hamid R. Parsaei</b> | <b>309</b> | Design and implementation of a relational data base<br>for automated process planning                |
| <b>Bert Naquin and Dia Ali</b>   | <b>313</b> | Active database and its utilization in the object ori-<br>ented environment                          |
| <b>Vidya Sagar Ranganathan<br/>and Dia Ali</b>   | <b>317</b> | Distributed object management, integrating dis-<br>tributed information in heterogeneous environment |

### ***CONCURRENT ENGINEERING***

- |  |            |   |
|--|------------|---|
| <b>Ganesh M. Krishnaswamy<br/>and Ahmad K. Elshennawy</b>        | <b>321</b> | Intelligent concurrent engineering environment                            |
| <b>Jian (John) Dong,<br/>Hamid R. Parsaei and<br/>Tim Gornet</b> | <b>325</b> | Manufacturing features extraction and recognition                         |
| <b>Thomas M. West and<br/>Sabah U. Randhawa</b>                  | <b>329</b> | Multicriteria evaluation of the design/build process                      |
| <b>Thomas A. Shipley and<br/>Robert L. Armacost</b>              | <b>333</b> | Systematic approach in new product development                            |
| <b>R. Bruce Taylor and<br/>Thomas M. West</b>                    | <b>337</b> | A methodology for the evaluation of integrated manu-<br>facturing systems |

### ***DECISION SUPPORT***

- |   |            |  |
|---|------------|--|
| <b>Antti J. Kanto and<br/>Vesa Männistö</b>   | <b>341</b> | Network-level pavement management system in Fin-<br>land—an optimization tool for improved roadkeeping |
| <b>Celestine A. Ntuen,<br/>Eui H. Park and<br/>William Byrd</b>   | <b>345</b> | A heuristic program for reliability and maintainability<br>allocation in complex hierarchical systems  |
| <b>John H. Ristroph,<br/>Ranganathan Muralidharan,<br/>Naresh Miglani,<br/>Kym B. Arcuri and<br/>Maurice Knight</b> | <b>349</b> | Pollution prevention decision support system   |
| <b>Hannu Kivijärvi and<br/>Markku Tuominen</b>  | <b>353</b> | A decision support system for evaluating intangible<br>investments                                     |
| <b>Hamid R. Parsaei,<br/>Mickey R. Wilhelm and<br/>Sai S. Kolli</b>   | <b>357</b> | Application of outranking methods to economic and<br>financial justification of CIM systems            |

## Contents

- |   |     |  |
|---|-----|--|
| <b>Tanvir Arfi and<br/>Behnam Bahr</b>                  | 361 | Development of decision support knowledge based system for tool wear diagnosis                                     |
| <b>George K. Hoepfner and<br/>Fernando Mata</b>         | 365 | A multi-criteria decision analysis methodology for selection of a preferred residence based on physical attributes |
| <b>S. S. Kolli, P. S. Damodaran<br/>and G. W. Evans</b> | 369 | Geographic information system based decision support systems for facility location, routing and scheduling         |

### **NEURAL NETWORK**

- |   |     |  |
|---|-----|--|
| <b>Celestine A. Ntuen,<br/>E. H. Park, J. M. Deeb,<br/>W. Winchester and<br/>E. Mansfield</b> | 373 | The development of flight simulation database using handling quality studies   |
| <b>Godwin Udo</b>   | 377 | Neural network performance on the bankruptcy classification problem  |
| <b>David B. Sieger and<br/>Adedeji B. Badiru</b>  | 381 | An artificial neural network case study—prediction versus classification in a manufacturing application              |
| <b>Serge Toure, Luis Rabelo<br/>and Tomas Velasco</b>   | 385 | Artificial neural networks for flexible manufacturing systems scheduling   |
| <b>Jun Wang</b>   | 389 | A neural network approach to multiple-objective cutting parameter optimization based on fuzzy preference information |
| <b>Wonjang Baek</b>   | 393 | Pattern classification via linear programming  |
| <b>Tomas Velasco and<br/>Mark R. Rowe</b>   | 397 | Back propagation artificial neural networks for the analysis of quality control charts                               |
| <b>Kamal S. Ali</b>   | 401 | Self learning for autonomous systems   |

### **HUMAN FACTORS AND ERGONOMICS**

- |   |     |   |
|---|-----|---|
| <b>Jeffrey C. Woldstad and<br/>Gregory B. Stewart</b>                 | 405 | A computer-based method for recording three-dimensional body postures   |
| <b>Bob White and<br/>Robert Wygant</b>                                | 409 | Ergonomic analysis of lifting tasks using computerized cinematography   |
| <b>H. Greig Lindner,<br/>Faith T. Chandler and<br/>Dennis W. Pate</b> | 413 | An examination of the human factors support of NASA's safety directorate on the space station processing facility (SSPF), Kennedy Space Center, Florida |
| <b>Saeid Motavalli and<br/>Faiz Ahmad</b>                             | 419 | Measurement of seating comfort  |

- |  |     |   |
|--|-----|---|
| <b>Robert M. Wygant,<br/>Bob E. White and<br/>Doug Hunt</b>  | 423 | Combining ergonomics and work measurement for job analysis          |
| <b>Yasuhiko Saito,<br/>Takuji Yamamoto,<br/>Saho Ayabe-Kanamura<br/>and Toshinori Kobayashi</b>                | 427 | Effects of favorite and unfavorable odor stimulus on ERP components |
| <b>Toshinori Kobayashi,<br/>Yoshinobu Iguchi,<br/>Yasuhiko Saito,<br/>Sunao Uchida and<br/>Takuji Yamamoto</b> | 431 | Effects of daytime activities on sleep qualities                    |

### **QUALITY AND RELIABILITY**

- |  |     |  |
|--|-----|--|
| <b>Chang Eun Kim, Young In<br/>and Mitsuo Gen</b>    | 435 | Replacement policy for a partially observable Markov decision process model using fuzzy data                                 |
| <b>Robert M. Remski and<br/>Shimon Y. Nof</b>        | 439 | Analytic and empirical assessment models of on-line inspection technologies  |
| <b>Ming C. Liu and Lori Aldag</b>                    | 445 | Computerized continuous sampling plans with finite production  |
| <b>Noel Artiles-León and<br/>Roberto Pérez-Matos</b> | 449 | Optimization of average-run-length properties of control charts using recurrent events                                       |
| <b>Nasser S. Fard and<br/>Jason J. Kim</b>           | 453 | Analysis of two stage sampling plan with imperfect inspection  |
| <b>Peng-Fei Wang and<br/>Lih-Hsing Hsu</b>           | 457 | Finding the most vital edge with respect to K-terminal reliability in series-parallel networks                               |
| <b>George Abdul-Nour</b>                             | 461 | On some factors affecting the just-in-time production system output variability: a simulation study using Taguchi techniques |
| <b>Luis A. Quiroga and<br/>Tomas Velasco</b>         | 465 | Application of reliability concepts in automatic identification  |
| <b>Klaus Fischer</b>                                 | 469 | Performance-reliability-models and quality management  |

### **COMPUTER INTEGRATED MANUFACTURING**

- |  |     |   |
|--|-----|---|
| <b>Hamid Seifoddini and<br/>Manoocher Djassemi</b> | 473 | A dynamic part assignment procedure in machine cell formation               |
| <b>R. Meenakshi Sundaram and<br/>Kiran Doshi</b>   | 477 | Cellular manufacturing system design with alternative routing consideration |

## Contents

<b>L. J. George, John W. Priest and G. T. Stevens</b>	<b>481</b>	<b>Proprinter design for manufacturability</b>
<b>Ali K. Kamrani, Hamid R. Parsaei and Mahfooz A. Chaudhry</b>	<b>487</b>	<b>A survey of design methods for manufacturing cells</b>
<b>Karl-Werner Hansmann</b>	<b>491</b>	<b>Integrated order release and scheduling for embedded flexible manufacturing systems</b>
<b>Munish Agarwal and Ali K. Kamrani</b>	<b>495</b>	<b>An automated coding and classification system with supporting database for effective design of integrated manufacturing systems</b>
<b>Ali K. Kamrani and Hamid Parsaei</b>	<b>499</b>	<b>Performance analysis of the cellular manufacturing systems: a decision support tool</b>
<b>Pranab Nayyar and Suresh K. Khator</b>	<b>503</b>	<b>Operational control of multi-load vehicles in an automated guided vehicle system</b>
<b>Arun S. Kashyap and Suresh K. Khator</b>	<b>507</b>	<b>Control rules for tool sharing in flexible manufacturing systems</b>
<b>Kevin Hooks, Luis Rabelo and Tomas Velasco</b>	<b>511</b>	<b>Enhancing computer aided inspection through the integration of quality control and computer aided design</b>
<b>Chell Roberts and Terrence G. Beaumariage</b>	<b>515</b>	<b>A specification technique for generating and simulating supervisory control</b>
<b>Ike C. Ehie and Godwin J. Udo</b>	<b>519</b>	<b>Reliability of information flow in a CIM system</b>
<b>R. Bruce Taylor</b>	<b>523</b>	<b>Development of a robust CIM laboratory environment using multi-criteria goal setting and evaluation</b>

## **INFORMATION SYSTEMS**

<b>Jim I. Jones and Kenneth R. Morrison</b>	<b>527</b>	<b>Work flow and electronic document management</b>
<b>Jinoos Hosseini</b>	<b>533</b>	<b>Revisiting and expanding Taylorism business process redesign and information technology</b>
<b>Robert M. Cowdrick</b>	<b>537</b>	<b>Logistic planning and control systems (LPCS)—fundamentals and future directions</b>
<b>Ronald R. Mourant and Sibel Tari</b>	<b>541</b>	<b>Simulation concepts for information system</b>
<b>P. S. Damodaran, S. S. Kolli and S. M. Alexander</b>	<b>545</b>	<b>The investigation of new approaches to business data analysis</b>
<b>Vincent Bommel and Mohammad Ilyas</b>	<b>549</b>	<b>A novel congestion control strategy in ATM networks</b>

- Kwok K. Choi and Mohammad Ilyas** 553 Relationship between eraser node and traffic intensity in counter rotating slotted ring

### **OBJECT-ORIENTED DSS**

- John M. Usher** 557 An object-oriented approach to product modeling for manufacturing systems
- Joseph A. Fisher** 561 Object oriented random number generators
- Sabah U. Randhawa, Charles C. Brunner, James W. Funck and Guangchao Zhang** 565 An object-oriented modeling framework for sawmill simulation
- Tarun Gupta and Rizvan Erol** 569 An integrated simulation model development environment for SLAM II Using Object-Oriented Paradigm
- Joakim Waxlax** 573 An object-oriented DSS for strategic management

### **KNOWLEDGE ENGINEERING**

- Marie E. Gomes and Daniel E. Snyder** 577 Integrating user needs by computer-supported interpretation of concept maps
- Ali K. Kamrani and Kamran K. Kamrani** 581 Manufacturing enterprise integration using hierarchial control and distributed database
- Steven H.-Y. Lai** 585 KBDA—a knowledge based design system for assembly
